Bossco International Offers Four “Illuminating” Choices for Fathers Day Gift Ideas

San Diego, CA (April 27, 2009) HI:BEAM, a brand of Bossco International, and an industry leader in all in one portable illuminators, suggests you “light up” dads life this June with an array of state of the art technology gift ideas.

The ultimate in wrench technology has arrived just in time for Father’s Day. The first-ever, patent pending **HI:BEAM Lighted Open End Wrench Set** allows you to complete any project even in the tightest and darkest spaces. Each wrench has a recessed LED light on both open ends with three light options—low beam, high beam and emergency flashing. Set includes 14 options with seven double-ended wrenches in both metric and standard measurements.

The HI:BEAM Luma Lite, a handy addition to any toolbox, is an all-in-one super bright light with a built-in magnetic base. Includes built-in magnetic base Velcro and hat clip attachments allow you to work hands free with direct light on any project near or far. Four bright LED lights last up to 100,000 hours. Luma Lites can rotate 360 degrees, tilt up to 45 degrees and are water and shock resistant.

A favorite of outdoorsmen is the **HI:BEAM Cuff Lite**, one of the most effortless portable lights on the market. This hunting and fishing must-have features elastic loops to pull over work gloves or bare hands for an instant flash of light. Available in black or camouflage the Cuff Lite fits right and left hands. Perfect for plumbers and electricians, too.

The **HI:BEAM Glove Lite** is a cool choice for those dads who bike, jog, or walk at night (or get themselves into tight places, like under the sink.) These highly versatile gloves with rotating lights and extremely bright illumination allow you to see—as well as be seen—adding safety to those nocturnal expeditions.

The complete HI:BEAM line is perfect for any project whether in the garage, workshop, out in the field, sports activities, camping, emergency roadside needs or any place where intense, hands-free light is needed.

The HI:BEAM line is proudly designed and engineered in the USA by Bossco International. All products are produced under strict ISO 9001 guidelines. Bossco International offers some of the most innovative, highly advanced and superior quality products on the market today. Call 866-933-2595 or visit www.bosscointernational.com
